Summary

I am a Software Engineer with 3 years' experience in enterprise-scaled web applications. I possess a strong passion for pursuing algorithmic training and contributing to open-source projects. I am confident that my expertise can be of great value to your organization.

Work Experience

Coherent Capital Advisors
Software Developer Intern, Jun 2019 - Aug 2020
Frontend Software Engineer, Jul 2021 - Apr 2023

- Work as a core developer in the Coherent Flow Team
  - Develop and maintain digital forms solution which serves multinational clients
  - Work with developers and the Design System Team on customized UI theming
  - Collaborate with remote backend team to establish API standard
  - Assist other project team to develop ad-hoc features on top of core architecture
- Achievement:
  1. Successfully delivered software solution to FWD Smart and Coherent Flow projects, meeting all project requirements and achieving high user satisfaction
  2. Seamlessly deliver high-quality composite components, such as PDF Viewer and Table, in just two sprints or less.
  3. Play a key role in helping the team migrate user management to a secure Single-Sign-On solution within one sprint.
  4. Partner with the project team to swiftly integrate a client-side payment gateway, ensuring a smooth and secure payment experience for users
  5. Co-develop with colleagues a serverless API SDK for cross-team microservices, enhancing development efficiency for other software teams
- Technology Stack:
  - Frontend: React, JSON Schema, Ant-Design, Socket.io, Jest
  - Backend: RESTful API, Express.js, Node.js
  - Workflow: Git, Jira, Agile, Waterfall

Education

Bachelor of Engineering in Computer Science
The Hong Kong University of Science and Technology

- Achieved Second Class Honors
- Final Year Project on News Summarization
    - Keywords: Web Scraping, Supervised Classification, Text Summarization
    - Technology Stack: TensorFlow, Keras, Selenium, MongoDB, Express.js
